DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

* The primary reasons for allowance for claims 1-21 are the inclusion of the limitations of a printing apparatus comprising a first filter means for filtering out high-frequency noise overlaying a first detection signal generated by a first detection means according to conditions that reflect a movement condition of a scanning means and printing control means for printing based on the first detection signal from which the noise has been filtered out by the filter means. It is these limitations either alone or combined as claimed that have not been found, taught, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Gindele et al. (6,813,389) teach a method of processing a digital image comprising the steps of specifying a noise control parameter and employing a noise control parameter to adjust the tone scale of the digital image.

Art Unit: 2861

- Shinobara et al. (6,711,364) teach a color printer comprises compensation patterns formed on a conveyor belt, sensors detect the patterns and output a signal, a frequency component that is above the frequency that corresponds to the compensation patterns is cut off by a filter.
